- Client Side Web Development

PROFILE

I am a seasoned Software Engineer with a proven track record, specializing in the development of powerful web applications. My expertise lies in leveraging ASP.NET Core MVC and Entity Framework for robust backend functionality, while also excelling in creating dynamic React.js frontends and proficiently managing SQL databases. With a Bachelor's degree in Information Technology from Superior University, Lahore, I have a solid foundation in IT principles.

WORK EXPERIENCE

Dotnet Developer Consultant (Full-time) August 2023-Present
Allied Band Limited Head Office

Working at client side i.e Allied Bank Head Office.

Development and enhancement of Allied Bank's critical Loan Origination System (LOS) using VB.NET WebForms. Address and resolve user issues promptly, ensuring the smooth operation of the LOS system and providing effective solutions.

Spearhead the creation of new features and functionalities, continuously refining and expanding the capabilities of the LOS system to align with Allied Bank's evolving requirements.

Work extensively with VB.NET WebForms for frontend development, while managing the robust SQL database infrastructure that serves as the backbone of the LOS System.
